

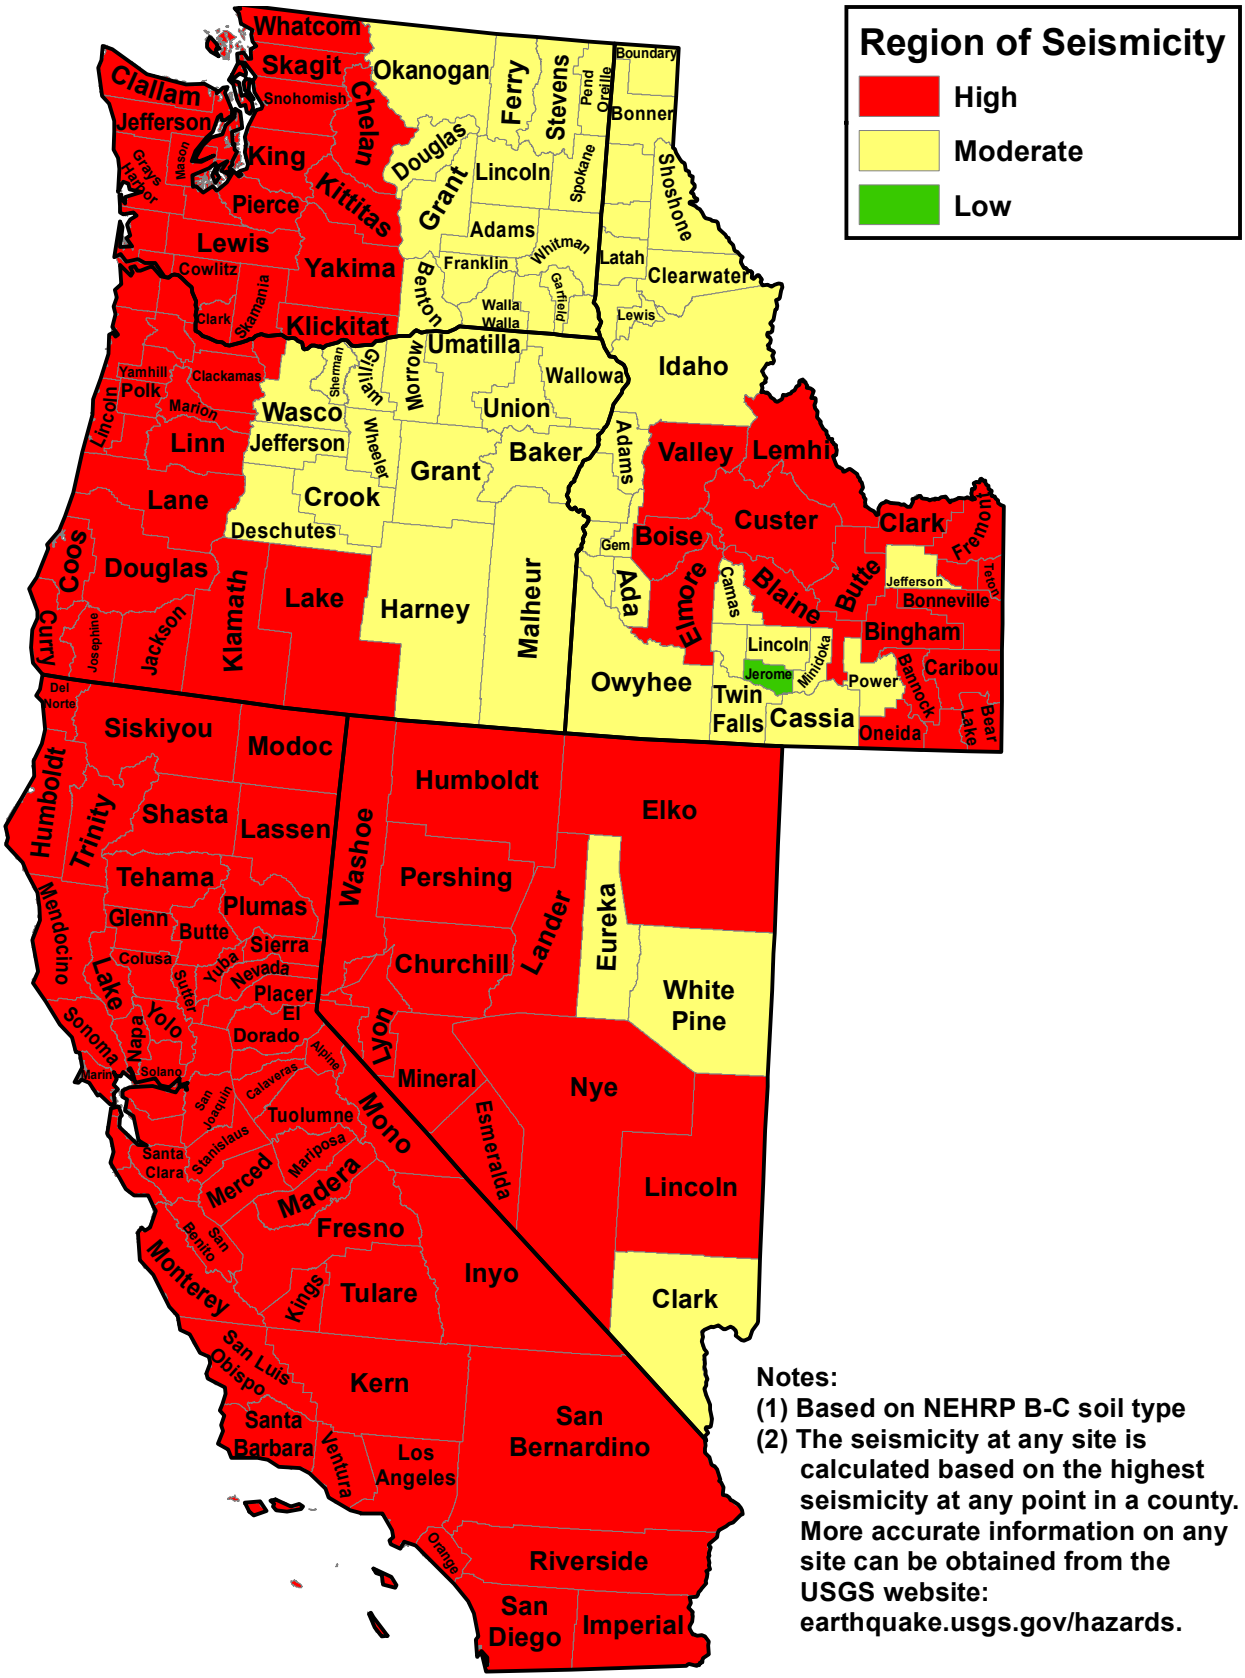
Region of Seismicity

- High
- Moderate
- Low

Notes:

(1) Based on NEHRP B-C soil type

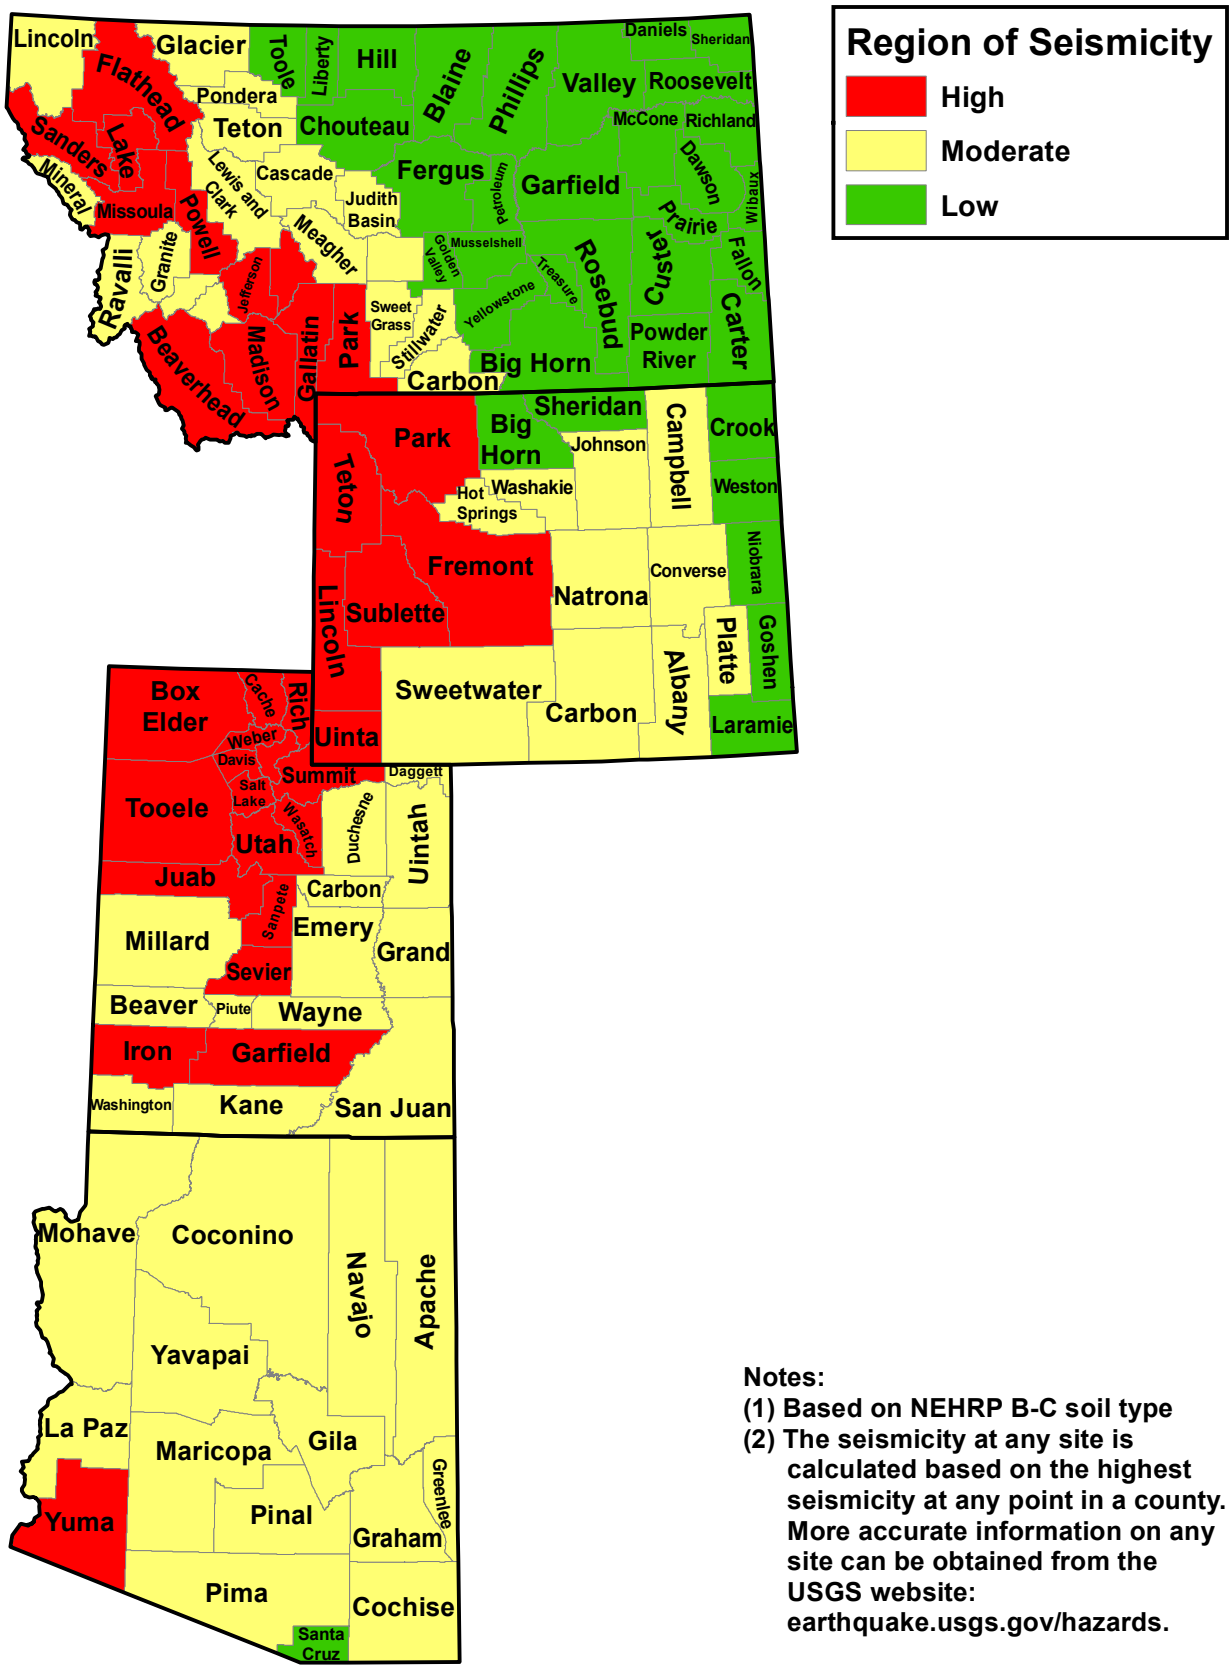
(2) The seismicity at any site is calculated based on the highest seismicity at any point in a county. More accurate information on any site can be obtained from the USGS website: earthquake.usgs.gov/hazards.



Notes:

(1) Based on NEHRP B-C soil type

(2) The seismicity at any site is calculated based on the highest seismicity at any point in a county. More accurate information on any site can be obtained from the USGS website: earthquake.usgs.gov/hazards.



Notes:

(1) Based on NEHRP B-C soil type

(2) The seismicity at any site is calculated based on the highest seismicity at any point in a county. More accurate information on any site can be obtained from the USGS website: earthquake.usgs.gov/hazards.
